

Darren Chalmers

Partner / ITC & Corporate Systems Manager

Darren has over thirty (30) years' experience with Bennett + Bennett commencing work as a field surveyor in 1986. He has worked on wide range of engineering, major high rise construction and general survey projects.

Darren's role encompasses the management of our multiple computer network (WAN) and mobile remote workstations. He ensures that our software, technology and equipment remains cutting edge and B+B is aligned to current best practices. Darren also trains our staff on our systems and provides all technology support for surveyors, project managers and associated consultants.

With his significant experience in both surveying and technology Darren has a vast knowledge of computer and software systems relevant to the surveying industry that enables Bennett + Bennett to provide timely, relevant information and results to clients and other consultants.
